Secure your Community

We should all have our own Gate Codes for the purpose of gaining access to the Front Gate and for the security of our LHE community. Check with the Front Office if you have forgotten yours. To enter your 4-digit code, start with the # sign and enter the 4-digit code. (instead of using your remote).

Your 3-digit code is the one you give to your guests, delivery person, or workman. The four-digit code should be treated like a personal password. When that code is shared with vendors, these vendors can then share the code with others. Now unknown people have 24/7 access to our community. When your guest punches in your 3-digit code, the system then sends a call to your phone. (Caller ID will indicate it is from Lake Henry Estates and you can see this person on Ch. 2492). **When you answer, if it is someone you are expecting, simply press 9 and hang up.** This will open the gate for your guest (or workman). **If it is someone you are not expecting just hang up.**

4-Digit = you   3-Digit= guest/delivery/worker

Once a code has been compromised, it will be permanently retired and will not be reused under any circumstances.

The security of our community is every resident's responsibility, particularly in these days of violent home invasions, and the soon large shopping mall adjacent to our front gate.
